

NAPNES

The National Association for Practical Nurse Education and Service, Inc.

**The Introduction of Our Complete NAPNES Mission Statements –
WITH Itemized Descriptions:**

NAPNES Mission is to - Advance the Profession of Practical Nursing through Promotion and Utilization of Our NAPNES National Standardized Multiple Access-Point Learning Curriculum.

The National Association for Practical Nurse Education and Service (NAPNES) Approved Standardized Practical Nursing Curriculum Program is the Premier Standardized Courses. The development is in association with IAS and their Educational Instructional Systems Design Division. This curriculum can be coupled with the Certification Programs in Long-Term Care and Pharmacology offered by NAPNES / IAS.

The entire NAPNES / IAS PN Program model is based on a holistic allied health education approach whereby student potential for success is maximized through learning scaffolds that build student knowledge from basic allied health concepts to more advanced concepts.

Each scaffold includes the ability to earn a credential that can be applied to the health care workplace.

CURRICULUM TABLE IS INCLUDED – APPENDIX A

THE MULTIPLE ASSESS-POINT LEARNING METHODOLOGY

The curriculum takes into account the use of multiple access points of fruition and exit. The standardization is used for CNA / HHA / PCT and Medication Administration followed through to the complete Practical Nurse graduate. These learning points can be used as terminal graduation or as exit points for remedial enhancement or changed learning platforms.

The National Association for Practical Nurse Education and Service (NAPNES) Approved Certified Nurse Assistant Program is the Premier Standardized Course(s) that can be coupled with the Certification Program in Long-Term Care offered by NAPNES / IAS.

The NAPNES / IAS CNA Program can be put together with the NAPNES Long Term Care (LTC) Certification program. This certification is designed for individuals with varying skill levels in the allied healthcare professions. The participants vary from the Certified Nursing Assistant (CNA), to the Nurse (LP/VN) healthcare student or bedside and management healthcare professional.

SEE CURRICULUM TABLE INCLUDED – APPENDIX A – Level One CNA

APPENDIX - A The PN Program Courses

All Level One Required Courses are completed

USE of combinations of these courses constitute Terminal Diplomas – HHA, PCT, Med Tech
